

SC-5050 IP LED strip

SC-5050IP-X
SC-5050IP-X2

Features:

1. Double layer pure copper PCB;
2. 3M adhesive tape for easy installation;
3. T or L type connectors for corner connection;
4. Max connection length is 10m, 120 degree;
5. Standard 5M on reel
6. 3 years warranty
7. CE, ROHS

Technical parameters :

| Model | Colour | Lumen | LED Type | LED Qty. (leds/m) | Width*Length (mm) | DC Voltage (V) | Rated Watt (w/m) | CRI | IP |
|--------------|---------------|-------|----------|-------------------|-------------------|----------------|------------------|-----|-----------------|
| SC-5050IP-X | White | 650 | 5050 | 30 | 10*5000 | 12/24 | 7.2 | >80 | 20/64/ 65/68 |
| | Neutral White | 640 | | | | | | | |
| | Warm White | 600 | | | | | | | |
| SC-5050IP-X2 | White | 1400 | 5050 | 60 | 10*5000 | 12/24 | 14.4 | >80 | 20/64/ 65/68 |
| | Neutral White | 1380 | | | | | | | |
| | Warm White | 1260 | | | | | | | |

| Model | Colour | Output | LED Type | LED Qty. (leds/m) | Width*Length (mm) | DC Voltage (V) | Rated Watt (w/m) | CRI | IP |
|----------------|--------|------------|----------|-------------------|-------------------|----------------|------------------|-----|-------------|
| SC-5050IP-RGB | RGB | R:330-400 | 5050 | 30 | 10*5000 | 12/24 | 7.2 | >80 | 20/64/65/68 |
| | | G:800-1000 | | | | | | | |
| | | B:330-400 | | | | | | | |
| SC-5050IP-RGB2 | RGB | R:330-400 | 5050 | 60 | 10*5000 | 12/24 | 14.4 | >80 | 20/64/65/68 |

Connecting&Installation Diagram:

5050IP RGB 24V

1. Connect black wire of LED strip to positive polarity of controller, and other colors match different color interfaces (the red wire is connected to R interface; the green wire is connected to G interface; the blue wire is connected to B interface).

2. If such strip is not required, the LED strip can be cut along scissor mark;

3.The cut strip can be connected with accessory connectors,then connect to controller;

5050IP single color 12/24V

1.The red wire of LED strip is connected to positive polarity,and the black wire is connected to negative polarity;

2.If such long strip is not required, the LED strip can be cut along scissor mark;

3.The cut strip can be connected with accessory connectors,then connect to power supply.

Packing instruction:

Installation requirement:

1. The LED strip should be installed on the surface of flame retardant, and thickness of wood or material exceed 2mm;
2. Please read the specification first, to make sure the service environment matches the condition in the specification before using;
3. The LED strip and accessories can't be squeezed and folded;
4. PCB conductive parts can't be damaged when installation;
5. Installation must conform to electrical safety standard. The LED strip can only be installed by professionals;
6. Pay attention to positive and negative polarities before installation, otherwise the LED strip may be damaged;
7. For security reasons, recommend parallel connection when installation. Ensure power supply transform operating load with transformer;
8. Cut the LED strip along the logo mark;
9. When install on metal or conductive surface, the contact must adopt insulation protection;
10. Please prevent static electricity when installation. The product need anti-corrosion environment, such as, avoiding damp, water drop or other adverse elements.
