3 POWER

Application

- ◎ Suitable for hotel, corridor, home decoration, shopping mall, exhibition room, etc.

Description

The line uses two bare DLP switches to adjust for 5 CCT and 3 power applications. The 0-10 volt control offers remote J-box dimming compatibility for easy installation in existing recessed areas. The frame does not require a separate shell, and the recessed jig is mounted directly onto the ceiling.

Features

- ◎ Achieve selection of three types of power through three-section dip switches.
- ◎ Achieve selection of five types of color temperature through five-section dip switches.
- ◎ Long service life: the adoption of LED lamp beads ensures that the service life exceeds 50000 hours.
- ◎ Compatible with most dimmers of North American to obtain good dimming effect.
- ◎ Type-IC rated and suitable for wet location applications.
- ◎ Dimming 0-10V.

NEW CONSTRUCTION AND REMODEL INSTALLATION DRIVER WIRING (See Figures 1-2):

Make sure power is turned off at the source before proceeding.

1. Open the hardwire box and remove the appropriate knockout(s).
2. Insert the electrical supply cable through the knockout and secure with a cable connector (sold separately).
3. Using wire nuts, connect green/ground wire of supply power (bare or copper lead) to Yellow/Green ground wire in junction box, connect neutral/common wire (White lead) of supply power to 18AWG white wire in junction box, connect line/hot wire (Black lead) of supply power to 18AWG black wire of box. Important: See Figures 1 and 2 for specific hardwire box wire identification guides.
4. For 0-10V dimming, use appropriate dimmer model and follow directions included with the dimmer. Be sure to attach dimmer correctly: Violet lead inside junction box is positive (+) and pink wire inside junction box is negative (-). See Figures 1.
5. Place all wiring and connections back in to the box and close the cover, making sure wires are not pinched in any way.
6. Push spring loaded clips on the fixture upwards and insert fixture base in to the mounting hole. Release the clips and fixture will be pulled flush to the ceiling (See Figure 2).
7. Once assembly is complete, turn on power to confirm fixture is working properly.

Notice

- ⦿ Please read the specification first, to make sure the service environment matches the condition in the specification before using.
- ⦿ Please confirm the applicable power supply before using.
- ⦿ Make sure the switch of product is off before connect to the power supply to prevent electric shock.
- ⦿ Operation against rules may damage your property even harm to your personal safety.
- ⦿ Dangerous high voltage, Non-professionals are not allowed to maintain the products.
- ⦿ If the exterior flexible cable or wire is damaged, it must exchange by the supplier, its agent or other similar qualified personnels to avoid dangers.
